

MPN&MPNr-EuroNet Meetings

MPN&MPNr-EuroNet organizes at least one meeting each year. Information on coming events is available on the network website (www.mpneuronet.eu).

Each MPN&MPNr-EuroNet meeting begins with a Special Session dedicated to a specific topic; leading experts in the subject are invited speakers. The Special Session is followed by short communications selected from abstracts submitted to MPN&MPNr-EuroNet's scientific committee; preference is given to studies related to the topic of the Special Session and to young investigators. MPN&MPNr-EuroNet working groups (WG) then hold their own session: Mutation Detection and Validation; Mutation Quantification and Molecular Residual Disease (MRD); Congenital Erythrocytosis and Hereditary Thrombocytosis. WG sessions are organized by the WG Chairs with the help of Co-Chairs. A poster session is also organized. The posters are showed during the whole length of the meeting.

MPN&MPNr-EuroNet strongly encourages collaborative studies. To facilitate such studies, informal "business sessions" are organized, where participants can propose new studies, discuss on-going studies and the results obtained, and prepare collaborative publications.
